

RIVERSIDE FREEWAY SR-91 Improvement Project

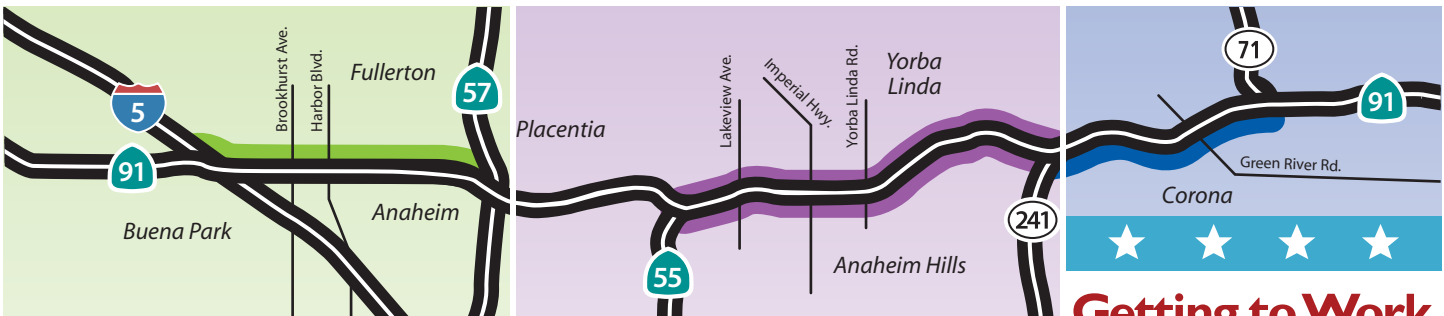

The Riverside Freeway (SR-91) serves as a major commuting route connecting Orange County with Riverside and Los Angeles counties. SR-91 is also one of the most congested freeways in Southern California.

To improve traffic flow along the congested SR-91 between the Santa Ana Freeway (I-5) in Buena Park and the Corona Freeway (SR-71) in Corona, the Orange County Transportation Authority (OCTA), the Caltrans District 12 and the Riverside County Transportation Commission (RCTC) are working together to add new lanes to SR-91.

Overall Benefits:

- Add new lanes to alleviate bottlenecks at key points between I-5 and SR-71
- Improve flow of traffic on SR-91 throughout this 22-mile stretch
- Enhance driving conditions by delivering operational improvements

Traffic Projection for SR-91

Getting to Work

Project Timing (approximate):

BUILDING FOR OUR FUTURE

Project 1	Project 2	Project 3
<p>New Westbound General-Use and Auxiliary Lane Addition: I-5 to SR-57 (OCTA) Late 2012-Late 2015</p> <p>Environmental Phase – Finished 2010 Design Phase – Started 2010</p>	<p>New Westbound and Eastbound Lane Additions: SR-55 to SR-241 (Caltrans) 2011-2013</p> <p>Environmental/Pre-Design Phase – Finished 2009 Construction Start – 2011 Construction Completion – 2013</p>	<p>New Eastbound Lane Addition: SR-241 to SR-71 (OCTA) Fall 2009-2011</p> <p>Design Phase – Finished 2009 Groundbreaking – Nov. 3, 2009 Completion – Late 2010</p>
<p>Current Project Status: Westbound Lane Addition Design Phase</p>	<p>Westbound and Eastbound Lane Additions Pre-Construction</p>	<p>Eastbound Lane Addition Complete</p>

Funding: Orange County voter-approved Measure M funds are hard at work on these projects. Other funding includes State Proposition 1B, State Traffic Congestion Relief Program (TCRP), 91 Express Lanes toll revenues and American Recovery and Reinvestment Act of 2009.
