

I-5 GATEWAY PROJECT

AFFECTED CITIES
Buena Park

LENGTH
3 miles

AT A GLANCE

PROJECT COST:	\$314 million
FUNDING:	Measure M1, State and Federal funds
CONTACT:	Measure M Program Management Office
OPEN TO PUBLIC:	September 2010

Fact Sheet Updated 5/7/19

PROJECT OVERVIEW

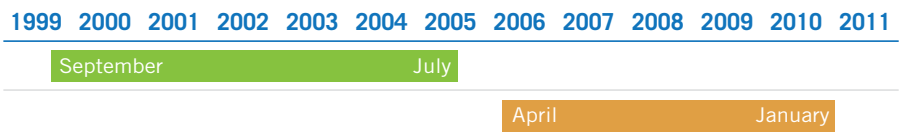

The project widened the remaining two miles of the Santa Ana Freeway (I-5) in Orange County from the Riverside Freeway (SR-91) to the Los Angeles County line. The I-5 Gateway Project was the final link in the original Measure M's (Orange County's half-cent transportation sales tax) ambitious freeway improvement program. Additionally, this project was funded by state and federal funds.

PROJECT BENEFITS

- Added a new travel lane in each direction
- Added a new carpool lane in each direction
- Added extended merging lanes where possible
- Rebuilt overpasses at Stanton Avenue, Beach Boulevard and Western Avenue
- Rebuilt Artesia Boulevard underpass and realigned northbound on- and off-ramps
- Realigned the railroad from Stanton Avenue to Artesia Boulevard
- Built aesthetically pleasing retaining walls
