Fact Sheet as of 9/10/19

PROJECT STATUS / OVERVIEW

OCTA in cooperation with The California Department of Transportation (Caltrans) is widening the San Diego Freeway (I-405) between State Route 73 (SR-73) and Interstate 605 (I-605). The project will improve 16 miles of I-405 and includes adding one regular lane in each direction from Euclid Street to I-605 and making improvements to freeway entrances, exits and bridges. It also will construct the 405 Express Lanes from SR-73 to I-605. The new express lanes – incorporating the existing carpool lanes and connectors that opened in 2014 – will be two lanes in each direction.

PROJECT FUNDING

The OC Go project, formerly Measure M, being constructed in cooperation with Caltrans, will be funded mostly through a combination of local, state and federal funds, with the express lanes portion of the Project paid for by those who choose to pay a toll and use the 405 Express Lanes. OCTA secured a \$629 million federal Transportation Infrastructure Finance and Innovation Act (TIFIA) loan for the I-405 Improvement Project, which will pay for a major portion of the \$1.9 billion worth of freeway improvements set to begin construction by early next year. Orange County taxpayers will save \$300 million in interest costs thanks to the U.S. Department of Transportation TIFIA loan program.

\$1.135 billion	OC Go funds
\$90 million	State funds
\$46 million	Federal funds
\$629 million	Federal TIFIA loan (secured by Express Lanes revenues)
\$1.9 billion	Total Project Cost
