

Notice of Availability of the

San Diego Freeway (I-405) Improvement Project

Final Environmental Impact Report/Environmental Impact Statement

WHAT'S BEING PLANNED

California Department of Transportation (CALTRANS) is proposing to improve the San Diego Freeway (I-405) by adding one General Purpose (GP) lane and a tolled Express lane in each direction to be managed with the existing carpool (HOV) lane as a tolled Express facility (Alternative 3) between State Route 73 (SR-73) and Interstate 605 (I-605). The proposed action would improve the operations on I-405 primarily in the County of Orange for approximately 16 miles between 0.2-mile south of Bristol Street and 1.4 miles north of I-605, as well as portions of State Route 22 (SR-22), SR-73, and I-605 to reduce congestion and improve lane continuity through the corridor. Alternative 3 was identified as the Preferred Alternative, which has the most benefits of the three build alternatives. This project is considered a Project of Air Quality Concern regarding particulate matter PM₁₀ and PM_{2.5} as defined in 40 CFR 93.123(b)(1). A qualitative PM₁₀ and PM_{2.5} hot spot analysis was completed, as required by 40 CFR 93.105 [c] [1] [i], based on U.S. EPA Guidance.

Per requirements of 49 U.S.C. 303: Section 4(f) of the Department of Transportation Act of 1966, as amended, a De Minimis finding was made regarding impacts to Cascade Park, Buckingham Park, Pleasant View Park, and Santa Ana River Trail that the project will not adversely affect the activities, features, or attributes qualifying the properties for Section 4(f) protection.
