

November 23, 2015

To: Members of the Board of Directors

From: Laurena Weinert, Clerk of the Board

Subject: OC Bus 360 - 2016 Draft Bus Service Plan

Transit Committee Meeting of November 12, 2015

Present: Directors Do, Jones, Katapodis, Murray, Pulido, Shaw, Tait, and

Winterbottom

Absent: None

Committee Vote

This item was passed by the Members present.

Directors Pulido was not present to vote on this item.

Committee Recommendations

- A. Direct staff to implement a public outreach program to solicit feedback on the 2016 Draft Bus Service Plan.
- B. Direct staff to return to the Board of Directors in early 2016 with outreach findings and final bus service change recommendations.

OC Bus 360 - 2016 Draft Bus Service Plan Staff Report

November 12, 2015

To: Transit Committee

From: Darrell Johnson, Chief Executive Officer

Subject: OC Bus 360 - 2016 Draft Bus Service Plan

Overview

As part of a comprehensive effort to re-position bus service to address changing market demands, a 2016 Draft Bus Service Plan has been developed. The goals of the plan are to reverse ridership declines and increase ridership by reducing travel times, improving travel service speeds, and designing services to benefit existing customers and attract new customers. It requires reallocating resources from low performing routes to high-demand markets while pursuing new travel options to serve lower demand areas. This plan is just one element in an overall strategy to improve bus service by examining it from many angles - an initiative named OC Bus 360.

Que Off

Recommendations

- A. Direct staff to implement a public outreach program to solicit feedback on the 2016 Draft Bus Service Plan.
- B. Direct staff to return to the Board of Directors in early 2016 with outreach findings and final bus service change recommendations.

Background

The Orange County Transportation Authority (OCTA) has experienced declining bus ridership, and efforts are underway to reverse this trend and to build a bus system that meets current and future market demands. This requires the examination of bus service from all angles. In addition to development of a new service plan, other activities include:

- Implementing faster services such as Bravo! and limited stop routes
- Purchasing and branding new vehicles
- Researching current customer needs through the Customer Satisfaction Survey
- Analyzing why riders left the system and where new markets exist through the Bus Market Study
- Pursuing technology improvements such as mobile ticketing and real-time passenger information
- Studying potential adjustments to the fare policy
- Assessing funding opportunities and constraints
- Reviewing alternative transportation such as vanpool, circulators, demand-responsive services, and transportation network companies to match modes with markets
- Investing in targeted marketing programs

Together, these initiatives are being packaged as OC Bus 360 – a comprehensive re-evaluation of bus service throughout Orange County.

In fiscal year (FY) 2014-15, OCTA's fixed-route bus service had 47 million boardings, the lowest level since FY 1996-97. Ridership during FY 2015-16 continues to decline, and annual OCTA bus ridership has also sharply decreased over the past decade from 23 to 15 per capita boardings per year. Addressing this ridership decline is the primary goal of the 2016 Bus Service Plan (Plan).

OCTA continues to experience challenges with revenues supporting the bus system, including important revenue sources such as sales tax and fare revenue. As a result, service improvements can only move forward with current resources. OCTA's Comprehensive Business Plan indicates that no additional revenues are anticipated to expand service over the next 20 years, and recent reductions in fare revenue and lower than projected growth in Transportation Development Act funding are putting pressure on the sustainability of the current service levels. Additional long-term funding from federal and state sources are also uncertain. ACCESS paratransit service growth will also compete for the same future resources as the fixed-route bus service.

In response, the existing fixed-route service was analyzed, and route-by-route recommendations are presented for implementation during the June and October 2016, service changes. The Plan is cost-neutral and is expected to grow ridership by 1.6 million boardings over the next several years.

Discussion

Based on the ridership decline and lack of new revenue, staff has prepared a cost-neutral route optimization plan to grow ridership. The plan is intended to reallocate resources currently used on lower performing routes to areas with higher demand. This approach is consistent with the initial recommendations from the recent American Public Transportation Association Peer Review and OCTA's Transit System Study (TSS) completed in 2011, as well as decades of experience by other transit agencies. In the right context, improvements in bus frequencies and speed result in increased ridership.

TSS

The TSS was a comprehensive analysis of how OCTA could operate the fixed-route bus service in a more efficient, cost-effective, and sustainable way. The 2011 study also benefited from input from the public and stakeholders. The following guiding principles were used to develop the TSS service recommendations:

- Invest in high performing services
- Decrease investment in low performing services
- Strategic use of Go Local (Project V) initiatives
- Design service to attract both dependent and choice customers
- Match service products to markets
- Reduce customer wait times
- Improve service speed
- Take advantage of the transition of Metrolink service to regional rail
- Reduce demand and cost for ACCESS

These principles are consistent with the approach that staff is recommending in the Plan. The TSS route-level changes were recommended to be phased in over ten years. The Plan implements most of the short-term recommendations from the TSS within two service changes to increase ridership.

Assessing Existing Route Performance

OCTA has developed a service performance index (SPI) to provide a detailed measure of performance at the route and day level (weekdays, Saturday, and Sunday). This measure helps inform where improvements, reductions, and restructuring of routes should occur.

The SPI uses three performance indicators. Passenger boardings per revenue vehicle hour measures service effectiveness in terms of usage per unit of service provided. Passenger miles per seat mile measures service efficiency in terms of

the percentage of seats occupied. Farebox recovery ratio measures financial efficiency in terms of farebox revenue as a percentage of operating cost.

Each performance measure for a given route and day is compared against the systemwide average. The three performance indicators are averaged and then converted into a score between zero and one. A higher score indicates better performance. In addition to SPI, a trend factor for the last 24 months is calculated to determine if the route performance is improving or worsening. A summary of the June 2015 SPI is provided in Attachment A.

<u>Draft Service Plan Recommendations</u>

The Plan prioritizes the route-level changes primarily using the TSS recommendations and recent SPI scores. In addition, other factors were considered such as ridership potential, coverage, subsidy levels, and recent customer input. Maps depicting the route-level changes are included in Attachments B and C. Detailed information describing each change and proposed implementation timeframe is included in Attachment D.

The following is a summary of impacts from the plan:

- Projected ridership growth of 1.6 million boardings over three years
- Improved system productivity and farebox recovery
- Increases the number of routes operating 15-minute peak frequency routes from 11 to 17
- Adds two new "Bravo!" routes and a second "Xpress" route
- Eliminates lowest productivity routes
- Changes American with Disabilities Act paratransit service area
- Systemwide bus rider impacts
 - No change (75 percent)
 - Improved frequency (17 percent)
 - Reduced frequency (four percent)
 - No service or use other route (one to four percent)

Staff recommends working with cities to develop community circulator services that better meet local community needs and connect to the regional system. This would include helping cities develop Project V Community Circulators, which could provide local coverage in areas no longer served by the OCTA bus service. The next Project V call for projects is scheduled to be released later this month.

Next Steps

Staff is seeking Board of Directors (Board) approval to present the Plan to the public in December 2015. A public outreach process is required for service changes of this magnitude, and the comments received will be used to refine the recommendations. With Board direction, a public hearing would occur in January 2016, and final recommendations would be presented to the Transit Committee and the Board in February 2016. This timeline is necessary to begin implementation of the new service changes starting in June 2016.

Summary

Recommendations are presented to grow ridership and improve efficiencies in the fixed-route bus system. Staff is seeking Board input on the recommendations and approval to solicit public and stakeholder feedback. Service change recommendations would return to the Board in February 2016, for implementation starting in June 2016.

OC Bus 360 - 2016 Draft Bus Service Plan Attachment C

OC Bus 360 - 2016 Draft Bus Service Plan Attachment D

					FEBRUARY 2016
Route	Day	SPI Rank	Annual Revenue Hour Change	Three Year Projected Ridership Change	Recommendation
64	WD	1	-	TO BE DETERMINED (TBD)	Huntington Beach to Tustin: via Bolsa Avenue / 1 st Street Implement 64X service on Bolsa/1 st based on results from 57X pilot project.
410	WD	160	(884)	(5,727)	Anaheim Canyon Metrolink Station to Anaheim: via Tustin Avenue/ La Palma Avenue Eliminate route because of low ridership. Existing riders can use Route 38 or Anaheim Resort Transit Route 17.
411	WD	161	-	-	Anaheim Canyon Metrolink Station to Canyon Corporate Center: via Coronado Street / La Palma Avenue Restructure route to better serve City of Anaheim Go Local plan
	UARY 2 TOTAL	016	(884)	(5,727)	

Note: Proposed February 2016 Service Change Recommendation do not require a public hearing.

					JUNE 2016
Route	Day	SPI Rank	Annual Revenue Hour Change	Three Year Projected Ridership Change	Recommendation
021	WD	143	3,320	39,401	Buena Park to Huntington Beach: via Valley View Street / Bolsa Chica Road Cut south end of route back to Goldenwest Transportation Center (GWTC) via Bolsa Avenue, Graham, and McFadden. Increase peak and midday frequency from 60 minutes to 45 minutes.
030	WD	23	11,982	229,950	<u>Cerritos to Anaheim: via Orangethorpe Avenue</u> Cut west end of route back to Cerritos Towne Shopping Center and east end of route back to Anaheim Canyon Metrolink Station. Create short-line between Fullerton Park & Ride and State College. Improve peak service to 15 minutes on short and 30 minutes on long.
035	WD	47	20,472	377,621	Fullerton to Huntington Beach: via Brookhurst Street Long-line of route from Brookhurst @ Commonwealth to Costa Mesa via Brookhurst, Victoria, Placentia, and West 19th Street. Short-line from Brookhurst @ Commonwealth to Talbert Medical Center. Improve peak headway from 30 minutes to 15 minutes on short-line. Off-peak service improved to 30 minutes from 40 minutes.
050	WD	40	9,224	241,483	Long Beach to Orange: via Katella Avenue Short-line between Knott and Anaheim Regional Transportation Intermodal Center. Increase peak service on short-line to 15 minutes based on customer requests.
051	WD	105	(8,857)	(190,779)	Santa Ana to Costa Mesa: via Flower Street Eliminate route because it is duplicative of parallel routes.
054	WD	27	16,429	303,904	Garden Grove to Orange: via Chapman Avenue Remove deviations to Orange Transportation Center and Outlets at Orange. Short-line from Beach Boulevard to Hewes. Peak service 15 minutes instead of 20 minutes on short-line; off-peak 15 minutes instead of 30 minutes.

SPI: Service Performance Index- Lower number is better score

Day: WD- Weekday, SA- Saturday, SU- Sunday

Major Service Change: Requires Public Hearing & Title VI analysis

					OCTOBER 2016
Route	Day	SPI Rank	Annual Revenue Hour Change	Three Year Projected Ridership Change	Recommendation
020	WD	134	(3,641)	(49,633)	<u>La Habra to Yorba Linda: via Imperial Hwy</u> Eliminate route because of low ridership.
026	WD	24	4,230	194,908	Fullerton to Yorba Linda: via Commonwealth Avenue / Yorba Linda Avenue Increase frequency to 15 minutes during peak between Fullerton Park & Ride and Cal State Fullerton. Cut east end of route back to Yorba Linda @ Rose. Increase frequency for peak hour trips east of State College to 30 minutes.
029	WD	22	(5,804)	(54,871)	La Habra to Huntington Beach: via Beach Boulevard Reduce local service to 20 minutes with Bravo! 529 Implementation.
037	WD	14	21,799	353,686	La Habra to Fountain Valley: via Euclid Street Reroute south end to South Coast Plaza via MacArthur, and Flower. New North Loop Terminus (Whittier, Euclid, Harbor, and Lambert) with alternating trips clockwise/counterclockwise around terminus loop. Peak headway 15 minutes instead of 30 minutes; off-peak headway 30 minutes instead of 40 minutes.
056	WD	65	2,905	50,665	Garden Grove to Orange: via Garden Grove Boulevard New western terminus at Beach and new eastern terminus at Parker. Improve peak frequency to 30 minutes from 40 minutes.
071	WD	34	8,944	134,415	Yorba Linda to Balboa: via Tustin Avenue / Red Hill Avenue / Newport Boulevard Eliminate route south of Triangle Square and improve frequency from 45 minutes to 30 minutes during peak and midday.

					OCTOBER 2016 (continued)
		SPI	Annual Revenue Hour	Three Year Projected Ridership	
Route	Day	Rank	Change	Change	Recommendation
072	WD	58	9,071	179,421	<u>Sunset Beach to Tustin: via Warner Avenue</u> Extend route to Tustin Ranch Road. Peak service 30 minutes instead of 45 minutes; off-peak 30 minutes instead of 60 minutes.
079	WD	71	3,621	97,416	Tustin to Newport Beach: via Irvine Boulevard / Culver Drive / University Avenue Improve frequency to 30 minutes all-day and remove Northwood deviation. Route on Bryan instead of Irvine Boulevard. Irvine Boulevard will be covered by recommended routing change to Route 167.
082	WD	81	(5,595)	(83,626)	Foothill Ranch to Laguna Niquel: via Portola Parkway / Santa Margarita Parkway / Antonio Parkway / Crown Valley Parkway Cut route back south of Santa Margarita at Antonio because of low ridership.
085	WD	129	(9,639)	(88,992)	Mission Viejo to Dana Point: via Marguerite Parkway / Crown Valley Parkway Cut route back south of Alicia Parkway at Crown Valley Parkway and reduce to 60 minutes frequency because of low ridership.
087	WD	94	(6,656)	(120,540)	Rancho Santa Margarita to Laguna Niquel: via Alicia Parkway Eliminate route because of low ridership.
529	WD	NA	22,185	618,843	(NEW Bravo!) Fullerton to Huntington Beach: via Beach Boulevard BRAVO! route from Fullerton Park and Ride to GWTC. 12 minutes peak, 18 minutes off-peak service.
167	WD	74	776	7,760	Anaheim to Irvine: via Tustin Avenue / Hewes Street / Bryan Avenue Restructure route to cover sections of Irvine Boulevard, Jeffrey Road no longer served by Routes 79 and 175. Serves new portion of North Irvine based on customer requests. Eliminate trips to Tustin and Miraloma, since it duplicates Route 24.
