

June 1, 2012

The Orange County Transportation Authority has begun construction of the Placentia Avenue and Kraemer Boulevard undercrossings. In accordance with federal railroad safety regulations, residents should expect to hear an increase in the frequency of train horns because of construction activities on and around the railroad tracks, regardless of quiet zone designation.

**Regular work hours are Monday through Saturday, 7 a.m. to 8 p.m.**

The following construction activities are anticipated to begin during the next two weeks:

## Placentia Avenue Undercrossing

**A closure of Placentia Avenue at the intersection of Placentia Avenue and the BNSF railroad tracks is scheduled from 8 p.m. on June 22 to 5 a.m. on July 2.** Detours will be marked with signage and changeable message signs along detour route. Traffic will be redirected easterly to State College Boulevard. See below for detour map.

- Contractor continuing soldier pile wall work within the BNSF corridor with setting wall panels and installing drains.
- Storm drain protection structure continues
- Continue work on Placentia bypass road
- Continue work at Crowther/Placentia intersection (storm drain, electrical conduits for signals, water)
- Night time closures of Placentia/Crowther intersection ongoing
- Preparation of sub-grade and sub-ballast for BNSF track installation at south shoofly tracks
- Continue install of VCP Sewer Line north of BNSF tracks

## Kraemer Boulevard Undercrossing

- Grading for continuous railroad shoofly (detour) along BNSF is ongoing
- Excavation and installation of temporary shoring for Retaining Wall #1 now complete
- Preparation of sub-grade and sub-ballast for BNSF track installation
- Site utilities work, including sewer, at Cardinal Street, ongoing

### BNSF Activity

BNSF is responsible for construction activities related to the installation of track necessary for the shoofly (railroad detour). OCTA and BNSF are closely coordinating their construction activities; however, **OCTA cannot direct the time and duration of BNSF activities.** Track installation activities will be loud and, depending on your location, you may experience additional vibration from the machinery. In addition to the track installation activities to shift rail traffic to accommodate the building of the rail bridges at Placentia Avenue and Kraemer Boulevard, BNSF is conducting track maintenance work along this corridor.

If you have any questions about this notification or other project issues, please contact:

**Tresa Oliveri, Outreach Project Manager, (714) 560-5374 or [toliveri@octa.net](mailto:toliveri@octa.net) or see below for additional options to “Get Connected/Stay Connected.”**

### Job Safety is OCTA's Top Priority

- Slow down and watch for workers and equipment
- Allow extra time to get to work, school and appointments
- Be extra careful when driving at night and in rainy weather
- Avoid use of mobile phones or other distractions
- Watch for closures and follow detours
- Be patient. Remember that this is a short-term inconvenience for a long-term solution.
