Marwan Youssef, City of Westminster

Any person with a disability who requires a modification or accommodation in order to participate in this meeting should contact the Measure M2 Local Programs section, telephone (714) 560-5673, no less than two (2) business days prior to this meeting to enable OCTA to make reasonable arrangements to assure accessibility to this meeting.

Agenda descriptions are intended to give members of the public a general summary of items of business to be transacted or discussed. The posting of the recommended actions does not indicate what action will be taken. The Committee may take any action which it deems
to be appropriate on the agenda item and is not limited in any way by the notice of the recommended action.

All documents relative to the items referenced in this agenda are available for public inspection at www.octa.net or through the Measure M2 Local Programs office at the OCTA Headquarters, 600 South Main Street, Orange, California.

Call to Order and Self Introductions

Consent Calendar Items

All items on the Consent Calendar are to be approved in one motion unless a Technical Advisory Committee member requests separate action on a specific item.

1. Approval of April 27, 2016 Technical Advisory Committee Minutes – pg. 5

Discussion Items

2. Measure M2 Sales Tax Forecast
   Kurt Brotcke, Sean Murdock

   **Overview**

   Staff will provide an update on recent changes to the sales tax forecasting methodologies.

3. Comprehensive Transportation Funding Programs Guidelines Modifications – pg. 11
   Sam Kaur

   **Overview**

   Measure M2 allocates net revenues for the development of various competitive programs which will provide funding for local streets and roads, environmental cleanup, and transit projects. These programs include the Regional Capacity Program (Project O), the Regional Traffic Signal Synchronization Program (Project P), the Environmental Cleanup Program (Project X), the Community Based Transit Circulators (Project V), and Safe Transit Stops (Project W). OCTA staff will be updating the guidelines for Project O and Project P to facilitate the administration of the next call for projects. This staff report provides another opportunity to discuss policy issues that emerged out of the 2016 call for projects for RCP and RTSSP programs and discussions at the committee meeting held in April 2016.
Regular Items

4. Proposed 2016 Technical Steering Committee Membership
   pg. 15
   Sam Kaur

   Overview

   The Orange County Transportation Authority Technical Advisory Committee provides feedback and input on many local streets and roads related items and relies on the Technical Steering Committee to provide guidance on major technical issues. Technical Steering Committee members serve two-year terms, with the exception of one-year terms for the chairman and vice-chairman. This year, two positions became available, as Mr. James Biery and Ms. Natalie Meeks retired. Presented is the 2016 roster for review and approval to fill the positions from District 4 and At-Large members.

   Recommendation

   Approve the proposed 2016 Technical Steering Committee membership roster.

5. 2016 Measure M2 Community-Based Transit Circulators (Project V) Call for Projects Programming Recommendations for Capital and Planning Grants – pg. 17
   Sam Kaur

   Overview

   The Orange County Transportation Authority issued the 2016 Measure M2 Project V call for projects for Community-Based Transit Circulators in November 2015. Applications have been received and scored consistent with the Project V Guidelines. Projects recommended for funding are presented for review and approval.

   Recommendation

   A. Recommend for the Board of Directors approval the programming recommendations for Project V funding, in an amount not-to-exceed $26,711,659, plus inflationary adjustments for 17 local agency projects submitted under the capital and operating reserve categories.

   B. Recommend for the Board of Directors approval the programming recommendations for Project V funding, in an amount not-to-exceed $323,780, for seven local agency projects submitted under the planning category.

## Technical Advisory Committee
### April 27, 2016

### Voting Representatives Present:
- Shawn Pelletier, City of Aliso Viejo
- Natalie Meeks, City of Anaheim
- Steve Kooyman, City of Brea
- Raja Sethuraman, City of Costa Mesa
- Brad Fowler, City of Dana Point
- Mark Lewis, City of Fountain Valley
- Don Hoppe, City of Fullerton
- Dan Candelaria, City of Garden Grove
- Tom Herbel, City of Huntington Beach
- Manuel Gomez, City of Irvine
- Chris Johansen, City of La Habra
- Kanwal Singh, City of La Palma
- Ken Rosenfield, City of Laguna Hills
- Nasser Abbaszadeh, City of Laguna Niguel
- Mark Vukojevic, City of Newport Beach
- Frank Sun, City of Orange
- E. Maximous, City of Rancho Santa Margarita
- Tom Frank, City of San Clemente
- William Galvez, City of Santa Ana
- Marwan Youssef, City of Westminster
- Michael Wolfe, City of Yorba Linda
- Jim Kaufman, Caltrans

### Guests Present:
- Doug Anderson, City of Tustin
- Rudi Emami, City of Anaheim
- Juanita Martinez, Nicols Consulting Group
- Paul Rodriguez, Rodriguez Consulting
- Armando Salis, City of Stanton
- Jean Thomas, City of Santa Ana

### Staff Present:
- Kurt Brotcke
- Sam Kaur
- Adriann Cardoso
- May Hout
- Richard Bacigualpo
- Ben Ku
- Dave Simpson
- Kameron Altar
Meeting was called to order by Mr. Ken Rosenfield at 1:30 p.m.

Self-Introductions

CONSENT CALENDAR ITEMS

1. Approval of Minutes for February 24, 2016 (Gomez/Meeks)

2. 2016 Grant Funding Opportunities (Gomez/Meeks)

REGULAR ITEMS

Mr. Rosenfield informed the committee that Ms. Sam Kaur requested that agenda item 5 be moved to before items 3 and 4.

3. March 2016 Semi-Annual Review

Ms. Kaur provided background for the semi-annual review process and highlighted the Local Fair Share timely-use of funds extensions process that was included through the semi-annual review. Ms. Kaur stated that the March 2016 semi-annual review was launched in February 2016 to allow for additional time as requested by local agencies. Ms. Kaur stated that the project updates and local agency requests were reviewed, and recommended for approval as identified in Attachment A and described in Attachment B. Ms. Kaur reminded the committee that transfer requests must be submitted prior to filing close-out for the previous phase.

Mr. Sethuraman inquired about the placement of monies from project cancellations, and asked if those monies go to the next call for projects.

Mr. Brotcke stated that the monies from project cancellations are considered in the revenue forecast, and that the placement of those monies are dependent upon what the revenue forecast is for the next and subsequent call for projects. Mr. Brotcke reminded the committee that the forecasting methodology was recently revised, and stated that OCTA staff is working on a new forecast for the 2017 call for projects, concluding that the projects cancelled in the March 2016 Semi-Annual Review will be considered in the forecast for the 2017 call for projects.

Mr. Gomez requested clarification on the difference between a delay request and in timely-use of funds extension.

Ms. Kaur explained the delay request in accordance with the procedures identified in the CTFP Guidelines providing the example that if an agency is not able to award the primary contract within the same fiscal year as the CTFP funds are programmed then agency can request to delay the funds upto 24 months and OCTA will move the programming of the funds to the requested fiscal year. Ms. Kaur explained timely-use of funds extension in accordance with the procedures identified in the CTFP Guidelines clarifying that agencies have up to 36 months from the contract award date to expend Measure M2 funds and complete the project. If more time is needed, then agency can request timely-use of funds extension of upto 24 months to expend the funds and complete the project.
Mr. Gomez referred to the timely-use of funds extension requests in Attachment A and confirmed that the listed projects have been awarded. Mr. Gomez inquired if the monies awarded have been spent.

Ms. Kaur clarified that it is not until a final payment request has been submitted to OCTA and at that time actual expenditures can be determined.

Mr. Vukojevic asked that if an agency requests a delay of 24 months however can award within 12 months instead of 24 months, if there is an easier process to advance projects instead of waiting for another semi-annual review.

Ms. Kaur clarified that if an agency requested a delay request for up to 24 months, and was able to award the contract within 12 months, then it is not an advance and will not need to be processed through semi-annual review. Local agency can notify OCTA staff that they were able to award the contract early. Ms. Kaur differentiated that if it was the agency’s initial allocation and project was programmed in the outer years and is ready to award early then OCTA will need to process advance through the semi-annual review. Ms. Kaur concluded that this keeps the incentive for agencies to deliver early.

There was no further discussion.

*The committee approved the proposed adjustments to the Comprehensive Transportation Funding Program project allocations. (Gomez/Meeks)*

**DISCUSSION ITEMS**

4. Fixing America’s Surface Transportation ACT

Mr. Ku presented the item which comprised of the core programs of the 2015 ACT, expected apportionments, and the differences in implementation from the previous MAP-21 legislation. Mr. Ku highlighted that while MAP-21 provided programming capacity on a short-term basis, the FAST Act will fund projects for 5 years, from fiscal year 15/16 to 19/20. Mr. Ku provided a break down of $305 billion, noting that there are two portions of OCTA’s interest. The Federal Highway Administration (FHA) which receives $226.3 billion, and the Federal Transit Administration (FTA) which receives $61.1 billion. Mr. Ku noted further that when those funds get broken down, it is shown that about $207.4 billion can go towards apportioned programs. Mr. Ku provided a break down of the $207.4 billion and presented California’s portion of $19 billion. Mr. Ku went over the National Highway Performance Program (NHPP), Surface Transportation Block Grant Program (STBG) previously known as Regional Surface Transportation Program (RSTP), Transportation Alternatives, Highway Safety Improvement Program (HSIP), Congestion Mitigation and Air Quality Program (CMAQ), National Highway Freight Program, National Significant Freight and Highway Projects, Tolling/HOV, and The National Environmental Policy Act (NEPA) Delegation.

Mr. Bacigalupo confirmed that the FAST Act is a needed legislation and one that could be relied on in particular for the extended projects. Mr. Bacigalupo continued coverage with regard to the FTA portion stating that the entire transit program will grow from $8.5 billion in 2015 to $10.1 billion in 2020. Mr. Bacigalupo stated that more importantly with regard to MAP-21 and with the redistribution of funds from the Bus to the transit side called State of Good Repair which OCTA did not benefit from. Now with OCTA’s efforts in Washington a Bus Discretionary program was added which is a competitive program and OCTA will be eligibel to apply. Mr. Bacigalupo noted that these funds can be used for a
Mr. Bacigalupo went over the ideas for discussion that OCTA will go over with the state on the application for a waiver on the degradation improvement under the FAST Act.

Mr. Rosenfield asked if the California Transportation Commission (CTC) would be implementing the rules for the new program.

Ms. Cardoso explained that in the past there has been a traditional 60/40 split between the state and local agencies. Sixty percent of the funds go to state programs, and forty percent of the funds go out to local agencies through local assistance programs. Caltrans has indicated that they believe this 60/40 split can be maintained. There is a proposed legislation specific to the formula for the National Highway Freight Program. Regional Agencies may be in support of a formula that would distribute the funds out to regions the same way that the Trade Corridors Improvement Fund (TCIF) were distributed. Regions are asking Caltrans to keep the formula program for the National Highway Freight Program out of the 60/40 split because it complicates everything else that falls under the program. Ms. Cardoso clarified that only ten percent of the funds can be used toward port or grade separation, so ninety percent of the funds are assumed to be used on the state and highway system, therefore the 90/10 split on the surface looks like more RSTP funds would be available.

Mr. Abbaszadeh inquired about the NEPA delegation and if a pilot program is expected.

Ms. Cardoso stated that a cooperative committee at the state level is working on that program and to establish a process to deploy it.

There was no further discussion.

*The item was received and filed by the committee.*

5. Comprehensive Transportation Funding Programs Guidelines Modifications

Mr. Rosenfield explained to the committee that input on the item has been requested from staff.

Mr. Brotcke reviewed the issues that came up during the last call for projects including; program balance, project readiness and delivery, and technical concerns. Mr. Brotcke encouraged the committee to keep the goal of the program in mind as they recommended modifications. Mr. Brotcke encouraged the committee to review the alternative level of service (LOS) concern that was brought before the committee at a previous meeting and have a solution that is anchored in standard practice.

Ms. Kaur explained the potential options to help OCTA manage the call for projects and local agencies to deliver current and future CTFP commitments. Ms. Kaur explained that potential options include project level caps as it relates to the scale of the program, project readiness to assure timely delivery of the Measure M dollars, project delivery to address local agencies concerns of limited resources and removal or clarification of the alternative methodology to determine level of service.

Mr. Rosenfield opened the floor to comments on the proposed modifications. Mr. Rosenfield started the discussion by stating there was support made in the past in regards to the alternative LOS and suggested convening a working group to work on a solution.
Mr. Galvez speaking to project level caps reminded the committee that right-of-way (ROW) is expensive and if project level funding caps are going to be considered it may rule out larger projects that may have the regional impact.

Mr. Gomez cautioned the committee from reacting to issues from one call for projects, and instead encouraged the committee to wait for one more cycle to get a better idea of the modifications that can be made to address all concerns and issues.

Mr. Rosenfield stated that a funding percentage may be an alternative to a funding cap.

Mr. Lewis expressed concern over phased arterial projects that only receive funding for some phases and not other phases.

Ms. Kaur clarified that current CTFP guidelines address limits under the Intersection Capacity Enhancements (ICE) category explaining that an agency can include improvements up to 600’ from the center of the intersection. Ms. Kaur stated that OCTA does not currently have any limits identified under the Arterial Capacity Enhancements (ACE) category. Ms. Kaur stated that this option can help to split large scale ACE and ICE projects into two applications and provide for a better methodology to measure project cost effectiveness and related benefits.

Ms. Meeks announced that she needed to leave the meeting. Ms. Meeks thanked the committee for their continued work and explained that this was her last time sitting on the Technical Advisory Committee since she is retiring next month.

Mr. Rosenfield thanked Ms. Meeks for her contributions to the committee and the county as a whole.

Mr. Gomez stated that additional information needs to be included in the guidelines regarding the lifespan of environmental documents. Mr. Gomez emphasized the importance of timing for application cycles, if local agencies are required to have a local match, they need enough time to build that into the yearly budget.

Mr. Emami inquired about applying for different phases for funding because construction and ROW phases can overlap.

Ms. Kaur reminded the committee that the M2 ordinance is very specific about funding time frames to ensure project delivery.

Mr. Rosenfield suggested that a working group be tasked with reviewing the issues around the alternative methodology for LOS.

Mr. Brotcke stated that an email can be sent to the local agencies requesting volunteers, and that staff will bring back the guideline modifications to the committee after that time. Mr. Brotcke informed the committee that the current schedule shows an August 2016 release for the next call for projects.

There was no further discussion.

*The item was received and filed by the committee.*

   - Announcements Sent by Email – See Agenda

7. Committee Comments

8. Local Assistance Update
   - Mr. Kaufman informed the committee that Cycle 1 for the Systemic Safety Analysis Report Program (SSARP) is closed but funded projects are yet to be announced. Cycle 2 applications are due May 27, 2016, and any applications that were not approved in Cycle 1 would be automatically rolled into Cycle 2. Cycle 8 of the HSIP is expected to open in May 2016 with approximately $150 million funding available statewide. Cycle 1 of ATP is coming to an end, with the June CTC meeting the deadline for funding requests. Cycle 2 is starting up shortly after.

9. Staff Comments
   - Mr. Brotcke reminded the committee of vacancies on the Technical Steering Committee.

10. Items for Future Agendas

11. Public Comments
   No Public Comments.

12. Adjournment at 3:06 p.m.

To: Technical Advisory Committee

From: Orange County Transportation Authority Staff

Subject: Comprehensive Transportation Funding Programs Guidelines Modifications

Overview

Measure M2 allocates net revenues for the development of various competitive programs which will provide funding for local streets and roads, environmental cleanup, and transit projects. These programs include the Regional Capacity Program (Project O), the Regional Traffic Signal Synchronization Program (Project P), the Environmental Cleanup Program (Project X), the Community Based Transit Circulators (Project V), and Safe Transit Stops (Project W). OCTA staff will be updating the guidelines for Project O and Project P to facilitate the administration of the next call for projects. This staff report provides another opportunity to discuss policy issues that emerged out of the 2016 call for projects for RCP and RTSSP programs and discussions at the committee meeting held in April 2016.

Recommendation

Discuss modifications to the 2017 Comprehensive Transportation Funding Programs guidelines.

Background

The Regional Capacity Program (RCP) provides funding for improvements to the Orange County Master Plan of Arterial Highways (MPAH). The program also provides for intersection improvements and other projects to help improve street operations and reduce congestion. The Regional Traffic Signal Synchronization Program (RTSSP) provides funding for multi-agency, corridor-based signal synchronization throughout Orange County. These programs allocate funds through a competitive process and target projects that improve traffic by considering factors such as degree of congestion relief, cost effectiveness, and project readiness. The Comprehensive Transportation Funding Programs (CTFP) serves as the mechanism the Orange County Transportation Authority (OCTA) uses to administer the RCP and RTSSP, as well as the competitive
transit (Projects S, T, and V) and environmental cleanup programs (Project X). The CTFP guidelines provide the procedures necessary for Orange County agencies to apply for funding and seek reimbursement for projects following award of funds. These guidelines were originally approved by the OCTA Board of Directors (Board) on March 22, 2010, and were most recently updated and approved in August 2015.

**Discussion**

The CTFP guidelines originally approved by the OCTA Board in 2010 included the provision to modify and adjust the guidelines as needed. Some of the policy issues that emerged from the 2016 Call for Projects were discussed with the committee at the April Technical Advisory Committee (TAC) meeting. After the initial discussion and considering the feedback received from TAC members, staff is proposing modifications to the guidelines for 2017 call.

The primary areas of discussion under the policy level issues include Project Level Caps, Project Readiness, Payments for Right-of-Way (R/W) Phase and Alternative Methodologies for Level of Service (LOS).

1. **Project Level Caps:** Based on the discussion from April TAC meeting, modifications at this time will not include a cap for the R/W or construction, as suggested by some TAC members. Staff is proposing to split the RCP program into small and large projects category. The program will have a 60-40 split with the 60% of the funds set aside for CTFP requests less than or equal to $2 million and 40% of the funds set aside for CTFP requests above $2 million. The small and large dollar request amount and split percentage is based on the number and magnitude of projects currently funded through the CTFP. Should the funds remain in a category after initial recommendations, these funds can be moved to the other category for eligible projects.

2. **Project Readiness:** In order to apply for R/W and/or construction phase, a project must have all project level environmental clearances including California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) clearance (NEPA is only applicable to federally funded projects).

3. **Payments for Right-of-Way Phase:** Local agencies can request initial payments for ROW after having a signed ROW agreement with the
property owners and/or City Council adoption of the Resolution of Condemnation as applicable.

4. **Alternative Methodology for Level of Service (LOS):** OCTA staff sent out an email asking volunteers to serve on the working group to discuss the alternate methodologies for determining LOS or clearly define specific alternative methodologies, consistent with the traffic engineering practices. Working group recommendations may be incorporated into the guidelines as appropriate.

**Next Steps**

OCTA staff is currently working on updating the guidelines and will provide draft guidelines to the TSC and TAC in July 2016 for review and approval. The Draft guidelines will include changes based on the discussions today and additional changes as needed for clarification and administrative purpose.

**Summary**

The CTFP serves as the mechanism OCTA uses to administer the RCP and RTSSP. In anticipation of the 2017 annual call for projects, staff is discussing potential modifications to the guidelines.

Note: Shading indicates positions recommended for consideration for the 2016 Technical Steering Committee roster.

May 25, 2016

To: Technical Advisory Committee

From: Orange County Transportation Authority Staff

Subject: Proposed 2016 Technical Steering Committee Membership

Overview

The Orange County Transportation Authority Technical Advisory Committee provides feedback and input on many local streets and roads related items and relies on the Technical Steering Committee to provide guidance on major technical issues. Technical Steering Committee members serve two-year terms, with the exception of one-year terms for the chairman and vice-chairman. This year, two positions became available, as Mr. James Biery and Ms. Natalie Meeks retired. Staff is presenting the 2016 roster for review and approval to fill the positions from District 4 and At-Large members.

Recommendation

Approve the proposed 2016 Technical Steering Committee membership roster.

Background

The Orange County Transportation Authority (OCTA) Technical Advisory Committee (TAC) was established under enabling legislation for the former Orange County Transportation Commission. The TAC provides technical advice on issues related to streets and roads funding programs. The TAC also provides input regarding the allocation of Measure M2 (M2) competitive grant funds. The TAC is comprised of representatives from all Orange County cities, the County of Orange, the California Department of Transportation (Caltrans), and the Transportation Corridor Agencies. The TAC uses a Technical Steering Committee (TSC) to review and discuss major technical issues prior to the full TAC.

The TSC consists of nine voting members nominated by the TAC and approved by the OCTA Board of Directors (Board), as well as one ex-officio member appointed by the Caltrans District Director. There is one position for each of Orange County’s five supervisorial districts, two at-large positions, and the TAC chair and vice-chair.
TSC membership process is coordinated through the City Engineers Association of Orange County, the TAC chair, and reviewed by the TAC. In selecting TSC members, priority is given to maintaining a balance between small and large jurisdictions (small jurisdictions currently defined as those with populations less than 64,836), as well as consideration for a balance among supervisorial districts. Balance between north and south Orange County jurisdictions is considered to the extent possible.

During the past year, the TSC provided guidance and policy direction on a number of issues related to the annual call for projects for the M2 Regional Capacity Program and Regional Traffic Signal Synchronization Program. The input of the TSC is essential for the M2 call for projects and project selection.

**Discussion**

In April 2016, OCTA solicited letters of interest from local jurisdictions to fill the vacancies left by Mr. Biery and Ms. Meeks to serve their remaining terms on the committee. Mr. Biery’s term expires in December 2016 and Ms. Natalie Meeks’ term will expire in December 2017. The candidates recommended to fill respective positions will serve for the remaining term vacated by exiting members.

In accordance with the OCTA Board-approved guidelines for administering the TSC, the president of the City Engineers Association of Orange County and the chair of the TAC reviewed three candidate letters of interest and recommended the new TSC members shown in Attachment A. The recommended roster strikes a balance between both the small/large as well as north/south cities.

**Summary**

The Technical Steering Committee provides guidance and direction on major technical issues before presentation to the full Technical Advisory Committee. The Technical Steering Committee members serve two-year terms with the exception of the chair and vice-chair (one-year terms). There are two positions that need to be filled for the remaining term. Staff is presenting a recommended roster of the 2016 Technical Steering Committee for approval.

A. 2016 Proposed Technical Steering Committee Membership List
May 25, 2016

To: Technical Advisory Committee

From: Orange County Transportation Authority Staff

Subject: 2016 Measure M2 Community-Based Transit Circulators (Project V) Call for Projects Programming Recommendations for Capital and Planning Grants

Overview

The Orange County Transportation Authority issued the 2016 Measure M2 Project V call for projects for Community-Based Transit Circulators in November 2015. Applications have been received and scored consistent with the Project V Guidelines. Projects recommended for funding are presented for review and approval.

Recommendations

A. Recommend for the Board of Directors approval the programming recommendations for Project V funding, in an amount not-to-exceed $26,711,659, plus inflationary adjustments for 17 local agency projects submitted under the capital and operating reserve categories.

B. Recommend for the Board of Directors approval the programming recommendations for Project V funding, in an amount not-to-exceed $323,780, for seven local agency projects submitted under the planning category.

Background

Community-Based Transit/Circulators Program (Project V) is a competitive program under Measure M2 (M2) that provides funding to develop and implement local bus transit services, such as community-based circulators, shuttles, and bus trolleys that complement regional bus and rail services, and meet local needs in areas not adequately served by regional transit. This is a competitive program that provides funding for bus and vehicle leases/purchases, associated bus stop improvements, maintenance facilities for new service, seasonal and special event services, as well as parking leases for seasonal and special event services.
On November 23, 2015, the Orange County Transportation Authority (OCTA) Board of Directors (Board) approved the revised Project V Guidelines and directed staff to issue a call for projects (call). In addition to the capital cost and operating reserves, the revised guidelines also included funding for planning category. The planning grants will help local agencies explore transit demand, determine feasibility, ridership and prepare service plans to provide local transit services in future.

The programming period for this call for project is from Fiscal Year (FY) 2016-17 to FY 2022-23, spanning seven years, which corresponds to the useful life of the typical community circulator vehicle. Through 2023, approximately $65 million of Project V proportional M2 revenue is available after deducting $9 million in commitments provided in the 2013 call for projects.

**Discussion**

On February 29, 2016, 14 local agencies submitted 17 applications requesting $29,157,409, under the capital and operating reserve category to provide Project V services including special events, weekend, seasonal, and year-round services. In addition, OCTA received seven applications under the planning grants category for local agency projects to explore options for local transit services. Applications were reviewed for eligibility, consistency, and adherence to the guidelines and program objectives.

All the project submittals meet intent of the Project V program. Therefore, in order to maximize the benefits of community-based transit services, staff is recommending that the Board of Directors (Board) approve all projects submitted under the 2016 call. An exception to the seven-year grant period is the City of San Clemente’s (City’s) innovative demand-responsive rideshare proposal that is further described below.

The City submitted an application to provide demand-responsive rideshare services for the existing customers of OCTA routes 191 and 193. As included in the 2016 OC Bus Service Plan, Routes 191 and 193 will be terminated in October 2016. The City requested $3,360,150 to operate this service for seven years. Since this is the first time for funding and deployment of a transit project of this nature in Orange County, staff is recommending to support this concept as a pilot program for two years providing $914,400 in M2 funds plus City matching funds. OCTA staff will work with the City staff to establish the performance measures and scope of services for this project. Depending on the success of this program, staff will provide a report to the OCTA Board and make recommendations to continue or discontinue this pilot program in future.
The cities of Irvine, La Habra, Mission Viejo, and Westminster requested OCTA to operate the service. OCTA staff is recommending that the Board of Directors (Board) authorize the Chief Executive Officer to negotiate and execute cooperative agreements with the local agencies and purchase and service provider agreements with the vendors as necessary.

The local agencies are required to provide a minimum of ten percent local match. All projects are competitive and are being recommended for funding as outlined in Attachment A and Attachment B.

Staff is recommending $26,711,659, plus inflationary adjustments for capital and operating reserve category, and $323,780 for planning grants. Funds identified under the operating reserve category (Attachment A) are subject to the minimum performance requirements identified in the guidelines, including quarterly reporting of ridership performance and productivity. Participation in the operating reserve is limited to the useful life of the capital purchase with Project V funds.

**Summary**

Proposed programming recommendations for projects in the Project V Program have been developed by staff. Funding for 17 projects, up to $26,711,659, plus inflationary adjustments for capital grants, and $323,780 for planning grants in M2 funds is being recommended.
