

RIVERSIDE FREEWAY SR-91 **Improvement** Project

The Riverside Freeway (SR-91) serves as a major commuting route connecting Orange County with Riverside and Los Angeles counties. SR-91 is also one of the most congested freeways in Southern California.

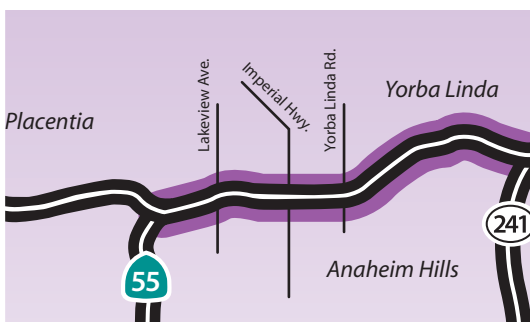

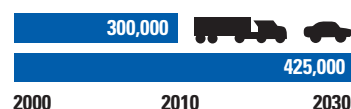

To improve traffic flow along the congested SR-91 between the Santa Ana Freeway (I-5) in Buena Park and the Corona Freeway (SR-71) in Corona, the Orange County Transportation Authority (OCTA), the Caltrans District 12 and the Riverside County Transportation Commission (RCTC) are working together to add new lanes to SR-91.

Overall Benefits:

- Add new lanes to alleviate bottlenecks at key points between I-5 and SR-71
- Improve flow of traffic on SR-91 throughout this 22-mile stretch
- Enhance driving conditions by delivering operational improvements

Traffic Projection for SR-91

Vehicles Per Day

Getting to Work

Project Timing (approximate):

Project 1

**New Westbound Lane Addition:
I-5 to SR-57 (OCTA)**

Environmental Phase – Started 2008

Current Project Status:

Westbound Lane Addition
Project Approval/Environmental Document

Project 2

**New Westbound and Eastbound Lane Additions:
SR-55 to SR-241 (Caltrans)**
2011-2013

Environmental/Pre-Design Phase – Finished 2009
Construction Start – 2011
Construction Completion – 2013

Westbound and Eastbound Lane Additions
Project Approval/Environmental Document Design

Project 3

**New Eastbound Lane Addition:
SR-241 to SR-71 (OCTA)**
Fall 2009-2011

Design Phase – Finished 2009
Groundbreaking – Nov. 3, 2009
Completion – Late 2010

Eastbound Lane Addition
Under Construction

BUILDING FOR OUR FUTURE

Funding:

Orange County voter-approved Measure M funds are hard at work on these projects. Other funding includes State Proposition 1B, State Traffic Congestion Relief Program (TCRP), 91 Express Lanes toll revenues and American Recovery and Reinvestment Act of 2009.
