

ASTALDI GROUP – COMPANY PROFILE

ASTALDI is the General Contractor in charge of the design and construction of the I-405 motorway, in joint venture with OHL.

ASTALDI is one of the most important construction groups at international level in the field of large-scale works. It ranks among the world's top 50 Contractors and among the top 20 in Europe, with established leadership in Italy and abroad. An international player for more than 90 years, it addresses the market by developing complex and integrated initiatives (design, construction, operation), with **solid expertise and highly specialized human resources**. It works mainly in designing and developing turnkey projects (EPC Contractor), but is also active in the sector of Concessions, as well as in the sector of the Operation & Maintenance.

The Group's segments of **activity range from Transport Infrastructure to Hydroelectric and Power Plants, from Civil and Industrial Construction to Systems and Facility Management, as well as Plants Design and O&M.** In each of these segments, **it has attained levels of excellence that have launched it to the top of international rankings:** in the segment of Infrastructure and Transport, it ranks **3rd in bridges, 13th in mass transit and rail, and 15th in highways.** In Energy, it holds **4th place worldwide in hydro plants.** In Civil Construction, it is ranked **13th in the building of healthcare facilities.**

Astaldi's projects are also often the result of **major collaborations with "starchitects,"** such as **Zaha Hadid's** Naples-Afragola High-Speed Station, and **Oscar Tusquets Blanca** who designed the Naples Underground's Toledo Station, named as Europe's most beautiful.

Listed on the stock market since 2002, the Astaldi Group in 2016 posted an order backlog of € 27 billion, boasting more than 11,500 employees and consolidated revenues of over € 3 billion, more than 80% of which overseas with Chile, Canada, United States, Turkey, Poland and Romania as its strongest markets.

The Astaldi Group has been **in the United States for about 30 years,** through its wholly owned company ACC, which operates mainly in the East Coast (Florida) and the West Coast (California).
