

Future Year Transportation Baseline Improvements

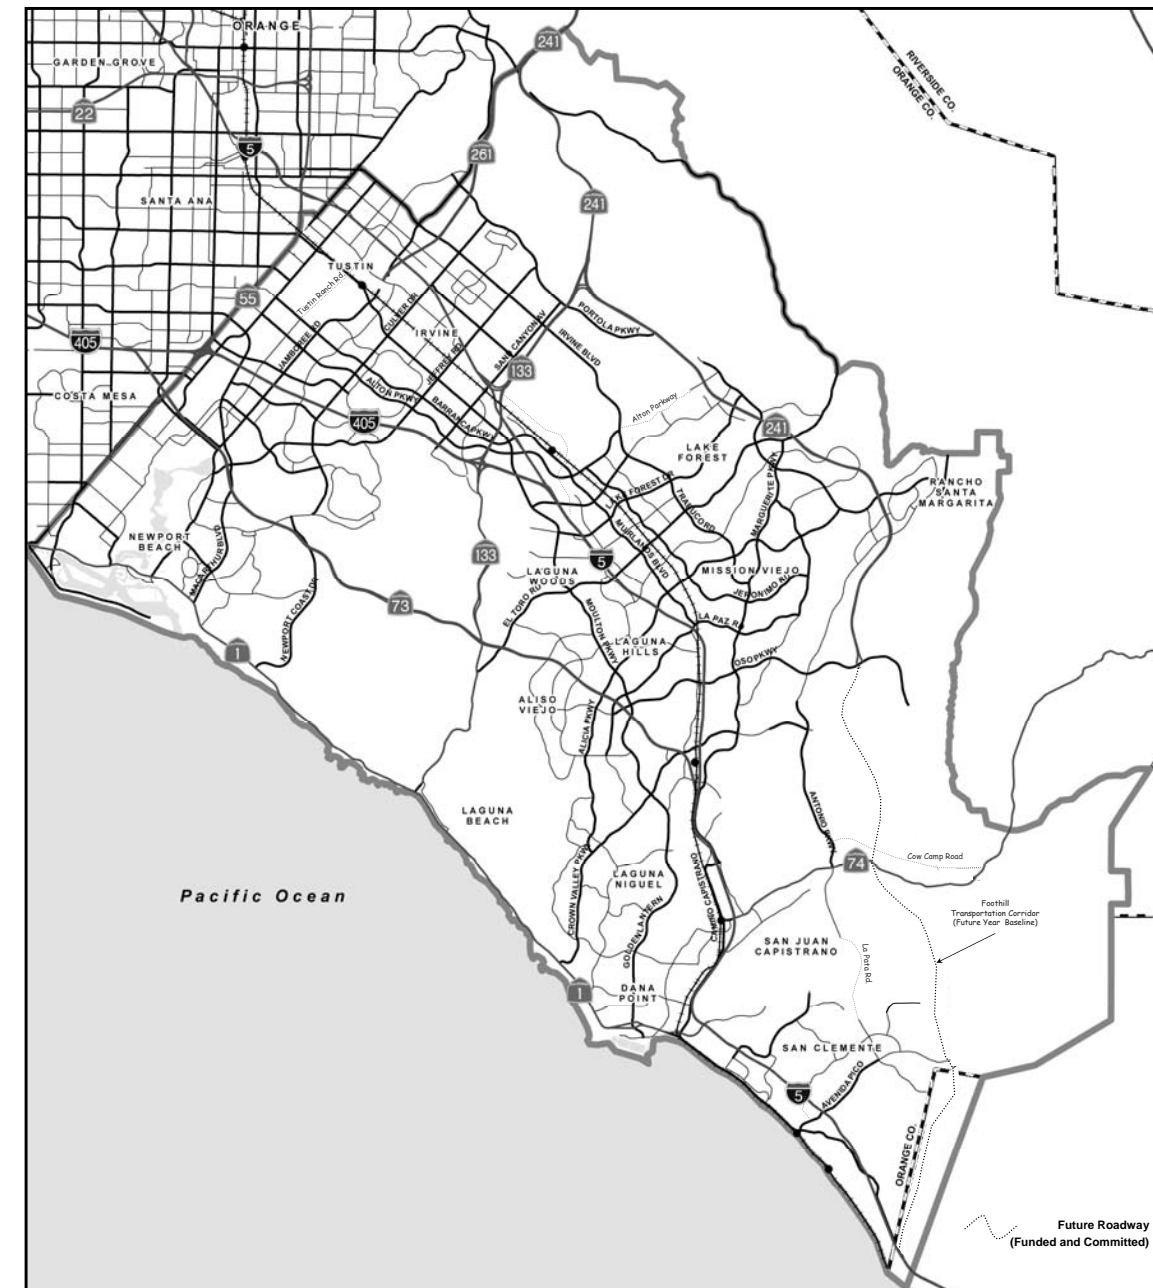

Future Year Transportation Baseline

The Future Year Transportation Baseline Improvements consist of transportation projects that are already planned and committed for 2030, the planning horizon year for the South Orange County Major Investment Study. This scenario represents future travel conditions in the south Orange County study area and is the baseline against which candidate transportation alternatives proposed for the South Orange County Major Investment Study will be assessed.

Key Transportation Features:

- ❖ Completion of the Foothill South Toll Road.
- ❖ Widening existing Toll Roads by one lane in each direction.
- ❖ Increased Metrolink Service to provide 30-minute frequency between Laguna Niguel/Mission Viejo station and Fullerton station.
- ❖ Construction of Committed Arterial Roadways including La Pata Road, Alton Parkway Extension, Tustin Ranch Road Extension and Cow Camp Road, among others.

Future Roadway (Funded and Committed)
