

High Transit Investment in Bus and Rail

Transit System

Objective:

Improve transit travel times and trip reliability in order to attract the discretionary rider. Address capacity constraints on the Los Angeles – San Diego (LOSSAN) Rail Corridor within the study area. Improve access to passenger rail stations.

Proposed Transportation Features:

- ❖ Provide Bus Rapid Transit Route from Tustin Station to downtown San Juan Capistrano, serving transit centers and major activity centers along the route
- ❖ Double-track LOSSAN Rail Corridor in tunnel, addressing areas that are currently single-track
- ❖ Increase passenger rail service by adding more round-trip trains
- ❖ Provide direct ramps from Jamboree Road to Tustin Station and from I-5 to Laguna Niguel Station
- ❖ Add high-capacity rubber tire trolley service to high activity rail stations
- ❖ Includes new rail station in Lake Forest
