

# Construction Alert

OCTA has begun emergency work to stabilize the railroad track through south San Clemente and safely restore passenger rail service.

## What

The Orange County Transportation Authority, in coordination with Metrolink, is working to stabilize railroad tracks through south San Clemente. Crews will install ground anchors into the large slope between the railroad tracks and the Cyprus Shore community to prevent further slope movement. More than 230 steel anchors will be drilled into bedrock deep beneath the slope.

*Example of ground anchor installation*

The Project is expected to take approximately 90 days, continuing through January 2023. More information at [octa.net/railimprovements](https://octa.net/railimprovements).

This work may be loud. Train horns may be sounded. The schedule is subject to change due to inclement weather or unforeseen operational issues.

## When

Work hours will be 6 a.m. to 6 p.m. Monday-Friday, beginning as early as Monday, Oct. 31. No nighttime work is anticipated.

# Construction Alert

## Construction Staging

Contractors will be using a lot on the corner of Avenida De Las Palmera and Calle Ariana as a work area during construction hours to produce concrete for the stabilization work. Approximately 10 construction vehicles are expected to access the work area daily and park on Calle Ariana.
